

Full Stack Engineer

Majd Abdo | +972 52-346-1665 | majdabdo43@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

- **Full Stack Software Engineer** with hands-on experience building scalable, real-time applications across mobile and web platforms.
- Experienced in React, Flutter, JavaScript, Node.js, Java Spring Boot, WebSockets, Kafka, MongoDB, MySQL, Firebase, Redis, Docker, Linux, and Git.
- Built and delivered complex production systems including real-time multiplayer platforms, AI-powered applications, and event-driven architectures, with strong focus on performance, reliability, and user experience.

Work Experience

2024–Present: Full Stack Engineer – Shah2Range Chess Company

Key Role:

Key Role:

- Built and maintained a real-time chess and social gaming platform across mobile, backend, and infrastructure layers.
- Developed cross-platform mobile applications using **Flutter** (Android & iOS) with complex state-driven UI and real-time updates.
- Designed and implemented backend services using **Java Spring Boot**, including **REST APIs**, schedulers, and database models.
- Engineered real-time communication systems using **WebSockets** (STOMP) for gameplay, chat, tournaments, and live updates.
- Implemented event-driven architecture using **Kafka** to enable scalable and decoupled service communication.
- Built advanced social features including private messaging, group chat, game invites, and media messaging with delivery/read states.
- Designed and developed a full Swiss-style tournament system including pairings, rounds, standings, and live boards.
- Integrated **Firebase** Cloud Messaging for cross-platform push notifications with correct lifecycle handling.
- Managed relational and in-memory data systems using MySQL, Flyway migrations, and Redis caching.
- Implemented presence systems and real-time synchronization without polling.
- Diagnosed and resolved production issues across mobile, backend, and infrastructure layers.
- Delivered end-to-end features from database design to user-facing UI in a production environment.

2025–2026: Full Stack Web Developer – Tandaro Transportation Company

Key Role:

- Designed and developed a full-stack booking platform using **React** and **Node.js**.
- Built **REST APIs** and integrated Firebase authentication and real-time data handling.
- Implemented booking workflows, user management, and dynamic frontend interfaces.
- Ensured scalable backend architecture and efficient client-server communication.

Full Stack Developer – Easy Travel (AI Trip Platform)

Key Role:

- Developed an AI-powered trip planning platform using **React**, **Node.js**, and **Gemini API**.
- Generated full travel plans including flights, hotels, activities, schedules, and weather insights.
- Implemented recommendation systems for personalized travel experiences.
- Designed interactive UX allowing users to engage with games during AI processing.

2025: Mobile Application Developer – SFL Association (Jerusalem Municipality)

Key Role:

- Developed a **Flutter** mobile application for legal professionals under the Jerusalem Municipality.
- Built cross-platform UI components and integrated backend services.
- Delivered a stable, production-ready application focused on usability and performance.

2024–2025: AI Engineer (Contract) – Outlier

Key Role:

- Contributed to AI model training and evaluation through prompt engineering and response validation.
- Improved model accuracy, reasoning quality, and output consistency across technical tasks.
- Worked on code generation, debugging, and technical reasoning scenarios.
- Collaborated on refining AI behavior for software engineering-related use cases.

Education & Certificates

2025: B.Sc. in Software Engineering – Azrieli College of Engineering Jerusalem.

2025: Flutter Development Bootcamp (4 months, production-level training).
